Scenario:
You are a college student who is a huge fan of music. You want to find a way to connect to people who have similar music tastes. You use our app to create connections with people all over.

Task 1: List your favorite artists and genres, and create an order list of them.

Task 2: Make a connection with someone who has similar or the same interests.

Task 3: Start a conversation and try to keep it going for more than 5 messages.

Notes:
What changes you should make to your application:
1. Easier to navigate
2. Cleaner UI
3. A settings menu

What you need to keep the same for your application:
1. The chat window
2. The "select your artists/genera" screen
3. The sign up screen.
